

"EASY 1 - 2 - 3 Steps" to ORDER YOUR OWN ROLLOUTS

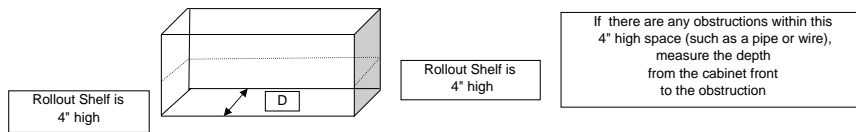

1. Measure the Unobstructed (Clear) Width [W] of your cabinet openings:

- A** Measure the cabinet's unobstructed [W] to the largest Whole Inch
For example, a cabinet opening of 24 3/8" wide is to be ordered as 24".
- B** If the door hinge is within the 4" H of the Rollout, measure [W] from the hinge.
- C** Note that the Rollout Shelves will be made 1/4" narrower than the whole inch ordered.
 For example: an order for a 24" Wide Rollout will be made 23 3/4" Wide giving a clearance of at least 1/8" on each side of the Rollout.
- D** Write the Rollout's Width (to the largest whole inch) in the Order Form below.

2. Measure the Unobstructed Depth [D] of your cabinet openings:

- A** Measure the cabinet's unobstructed [D] depth.
- B** Our Rollout Shelves are made in **(3) depths: 21 1/2" or 18 1/2" or 16 1/2" deep.**
- C** Select the largest Depth that will fit within the cabinet's unobstructed opening [D]
- D** Write the Selected Depth for the Rollout in the Order Form below.

3. Enter the ... Quantity ... Width ... and Depth ... of Your Rollout Order
